5. At the Authentication Method Screen Select **Username and Password** and click **Next**

6. You will then be prompted with the initial login screen.

Since you should already have SecureAuth Setup on your mobile device, and now Checkpoint set up, you are now ready to connect to the VPN.

3. You will then be given an 8-digit code. This number will change every 60 seconds and will act as your password for logging into Checkpoint VPN Client.

4. Now enter the 8-digit code into Check Point in the "Password" field. Your "Username" will be your user ID that you received previously.
